

E-LEARNING COURSE OF

Neonatology

2017

Goals

The aim of the e-learning course in Neonatology is to provide a basic understanding of the most common clinical problems that may be present at birth and in the early stages of life.

The course, of 77 video lessons given by experts in the field, presents the main neonatal diseases and the most frequent diagnostic and therapeutic interventions.

Particular attention is given to the clinical aspects which are explained in a simple way, thanks to the use of images and videos. The course shows the main techniques and the operation of numerous and complex devices normally used in Neonatal Intensive Care Unit.

The course is aimed at all operators (doctors and nurses) involved in neonatal care. The lessons are in English. There is the possibility to download the slides.

Teaching is done in the network according to the model adopted by digital lesson through the platform of the University.

Course Topics

Perinatal Medicine, Resuscitation and Intensive Care, Genetics, Surgery, Pneumology, Neurology, Infectious Diseases, Immuno-Hematology, Nutrition, Gastroenterology, Cardiology, Care, Dermatology, Ophthalmology, Screening, Nephrology, Radiology, Procedures and technical assistance, Instruments.

Director
